## PROFILE

I am a front-end web developer, but all through my years as a web developer, I found out that it is not sufficient to build websites and have websites generate traffic, if we can't guarantee the safety and protection of user data.

Companies are being hacked everyday, which makes one wonder actually how to mitigate these risks.

These questions and more led me to delve into the field of cybersecurity, I am a SOC analyst, with strong skills on how networks work, and how to protect our internal and external online networks and data from attackers.

I wish to enhance my professional skills, capabilities and knowledge with organizations that consider the safety and satisfaction of their users, through inclusion and transparency, who understands value of hard work, and entrusts me with responsibilities and challenges.

## EMPLOYMENT HISTORY

### CTO and Frontend web developer at CareerEdu

December 2022 — July 2023

1. Responsible for the Interpreting and implementing of visual interfaces using front end languages
2. Worked closely with internal and external stakeholders to discuss progress, make recommendations and proffer solutions in line with requirements for website features.
